TITLE : COMPOSITION FOR PHARYNGEAL DISEASE

ABSTRACT : PROBLEM TO BE SOLVED: To provide a composition for pharyngeal disease and keeping excellent bactericidal activity without content lowering of glycyrrhizinic acids without generating even precipitation and pharmaceutically stable, in a system mixed with quaternary ammonium salt and glycyrrhizinic acids.

SOLUTION: This composition for pharyngeal disease is composed of (A) a quaternary ammonium salt having bactericidal activity such as cetylpyridinium chloride, (B) glycyrrhizinic acid or its salts, (C) 16.0-40.0 W/V% based on total weight of the formulation of water, and (D) 50-90 W/V% based on total weight of the formulation of glycerol.
